Candidate architecture questionnaire v1.3

Initiative information requested as part of the scoping phase of the Canada Initiative Governance (CIG) process with a planned Gate 2 review by the Architecture Council, or upon specific request of an Enterprise Architect.

You'll be asked to complete several short sections of information related to the initiative (total time is ~20 min):

1. Initiative background,
2. Architecture engagement,
3. Significance assessment,
4. Technology platforms impact,
5. Data privacy, security & compliance, and
6. Guardrail alignment & scope.

Answers to this questionnaire will help to determine how and where the Solution Architecture process will be governed, for instance, by the Architecture Council or a Local Architecture Review Board.

Note: If your initiative is covered by a non-disclosure agreement such that answering the questions below would create a challenge for yourself, please reach out to either your operating unit's aligned Enterprise Architecture or send an eMail to the EA Tech Triage Lead (EATechTriage@canadalife.com) to discuss an appropriate approach and close out the form without submitting or saving responses.

INITIATIVE BACKGROUND

Provide basic information about the initiative and the business problem(s) it is attempting to solve.

1. Name of your Initiative *

Please supply the short name being used to identify the initiative within the enterprise.

I & O ExaData in Azure

2. Operating unit leading the initiative? *

What operating unit is responsible for initiating this effort?

- ◯ Global Corporate

- ( ) Digital Hub
- ( ) Enterprise Architecture
- ( ) Group Customer
- ( ) Individual Customer
- (•) Infrastructure & Operations
- ( ) Investments
- ( ) Security & Risk
- ( ) Technology Enablement & Platforms

3. Is this initiative internally confidential? *

Do the resources assigned need to be signed to be briefed on initiative activities? If yes and answering the questions below would create a challenge for yourself, please close out the form and reach out to either your operating unit's aligned Enterprise Architecture or send an eMail to the EA Tech Triage Lead (EATechTriage@canadalife.com) to discuss an appropriate approach.

- ( ) Yes
- (•) No

4. Please **input background summary** information. *

Ideally, this summary should be provided by the project sponsor(s), based on information captured in the initiative brief.

* The proposed migration is part of Technology's broader modernization strategy to leverage cloud capabilities and improve our IT infrastructure.
* Currently, Oracle Exadata runs in the Canada Life Winnipeg/Scarborough Data Centres. The Oracle managed physical hardware Exadata runs on is due for mandatory refresh. Canada Life will migrate Exadata to the cloud vs refresh on premises, to align with the modernisation strategy

SIGNIFICANCE ASSESSMENT

Understand the enterprise significance of the initiative to determine the required level of architectural governance.

5. Will the proposed solution require an architectural direction not currently part of our approved architectural guardrails? *

   Will the approach establish new guardrail(s), which include but are not limited to: principles, standards, design patterns, models, reference architectures, solution architectures, roadmaps, strategies, frameworks or templates, not yet approved for use within the ArK (https://769372677.sharepoint.com/sites/ark)?

   - ○ Yes
   - ◉ No
   - ○ Still to be determined

6. Will the proposed solution impact the solution architecture and/or design outcomes beyond the business/operating unit where the initiative originated? *

   Will the proposed solution have architectural implications for architecture communities and business/operating units beyond the sponsoring operating unit (not concerned with business process impacts, looking for cross unit technology impacts)? Is this a Canada-wide architecture outcome where other business and/or operating units would be expected to adopt, as well?

   - ◉ Yes
   - ○ No

7. Please provide more details about the beyond-operating unit architectural implications of the proposed solution. *

   You answered YES to the question above. Provide a brief summary of why you chose that answer.

   ExaCC on-prem will be moved to cloud database@azure

8. Will the architecture of the proposed solution impact existing enterprise: operations, capacity, scalability, and/or data location(s)? *

   Will the solution proposed result in significant change to operational processes, procedures or standards?

- (●) Yes
- ( ) No
- ( ) Still to be determined

9. Please provide more details around expected operational impact of the proposed solution. *

   You answered YES to the question above. Provide a brief summary of why you chose that answer.

   ExaCC on-prem will be moved to cloud database@azure, PaaS

10. Estimated intiative size *

    Level 1 and 2 initiatives fall under the Canada Initiative Governance (stage gate) process and have per-gate architecture deliverable requirements, based on Architecture Council guidance.

    - ( ) Level 1 (>= $5M)
    - (●) Level 2 (>= $1M, < $5M)
    - ( ) Level 3 (< $1M)

11. Have functional (business) or technical capability requirements already been defined for the solution? *

    - ( ) Yes
    - (●) No

TECHNOLOGY PLATFORMS IMPACT

How will the proposed solution leverage existing and/or new technology platform(s).

12. Will the proposed solution require any new platform technology? *

Does the proposed solution require technology platform(s) not supported for use at Canada Life?

- (●) Yes
- ( ) No
- ( ) Still to be determined

13. Please provide more information about the new technology platform needs of the proposed solution. *

You answered YES to the question above. Provide a brief summary of why you chose that answer.

ExaCC on-prem will be moved to cloud database@azure

14. Will the proposed solution require a newer version and/or create a new usage pattern for any existing enterprise technology platform(s)? *

- (●) Yes
- ( ) No
- ( ) Still to be determined

15. Please provide more information about technology platform(s) upgrades and/or new usage patterns triggered by the proposed solution. *

You answered YES to the question above. Provide a brief summary of why you chose that answer.

ExaCC on-prem will be moved to cloud database@azure

16. Which deployment model(s) is/are being considered for the proposed solution? *

- [ ] Software-as-a-Service (SaaS cloud)
- [x] Platform-as-a-Service (PaaS cloud)

- [ ] Infrastructure-as-a-Services (IaaS cloud)
- [ ] On-premise (CL data centres)

17. In the deployment option question, if your proposed solution selected *On-premise*, please provide more information about which solution components will reside in our data centre(s).

    Enter your answer

18. In the deployment option question, if your proposed solution selected *any of the cloud options (IaaS, PaaS, SaaS)*, please provide more information about which solution components will reside in which environments option and with which cloud provider.

    Oracle Database@azure
    Azure VPC
    Azure Direct connect
    OCI control plane

19. Have you researched whether any of these are available as a cloud marketplace offerings from Canada Life aligned cloud vendors (e.g. AWS, Azure)? *

    Our preference is always to leverage cloud marketplace offerings from our aligned cloud vendors when it makes sense for solution components. Do either MS Azure or AWS offer packaged alternatives that could be leveraged to implement components of the solution?

    - (●) Yes
    - ( ) No

20. Please provide more information about the marketplace components you found and which included within the proposed solution. *

    You answered YES to the question above. Provide a brief summary of why you chose that answer.

ExaCC on-prem will be moved to cloud database@azure

21. Are any new authentication or authorization capabilities required for the proposed solution? *

- (●) Yes
- ( ) No

22. Please provide more information about new authentication/authorization capabilities triggered by the proposed solution. *

You answered YES to the question above. Provide a brief summary of why you chose that answer.

migrating to cloud might need new authentication/authorization capabilities

23. Please identify any **Canada Life strategic platform(s)** that the proposed solution will leverage. **Please choose All that apply**. *

- [ ] Apigee (API/service delivery)
- [ ] Master data management (MDM)
- [ ] Data mesh (Connected Data Platform 2)
- [ ] Salesforce CRM or Marketing Cloud
- [ ] Power BI (BI/visualization)
- [ ] CP4BA (Workflow)
- [ ] DOC1/Engage1 (Document composition)
- [ ] SAP (ERP)
- [ ] UIPath (Automation)

- [x] None of the above

24. Does the proposed solution impact any existing system(s)? *

- (●) Yes
- ( ) No

25. Please identify impacted systems and provide a brief description of the impact. *

You answered YES to the question above. Provide a brief summary of why you chose that answer.

all the 42 applications that are currently on ExaCC on-prem

DATA PRIVACY, SECURITY & COMPLIANCE

26. Who are the target(s) for the proposed solution? **Choose ALL that apply**. *

- [x] Customers
- [x] Plan sponsors
- [x] Advisors
- [x] External partners
- [x] Employee

27. Which **data & compliance classification(s)** apply to the proposed solution and the underlying data? **Please select ALL that apply**. *

- [x] PII (Personally identifiable information)
- [x] PHI (Personal health information)

- [x] PFI (Personal financial information)
- [x] PCI (Payment Card Industry)
- [x] Protected B
- [ ] None of the above

28. Have any specific data residency expectations been defined for the proposed solution? *

- ( ) Yes
- (•) No

GUARDRAIL ALIGNMENT & SCOPE

How well does the proposed solution comply with existing enterprise architecture, security & compliance guardrails?

29. Will the proposed solution comply with all Canada Life **architecture principles**? *

Enterprise architecture principles can be reviewed at https://769372677.sharepoint.com/sites/ARK/SitePages/Principles.aspx

- (•) Yes
- ( ) No

30. Will the proposed solution comply with all Canada Life **architecture guardrails**? *

Are there existing architecture guardrail(s) already governing the operating unit launching this initiative that this submission is planning deviate from and/or alter? Enterprise architecture guardrails can be reviewed at https://769372677.sharepoint.com/sites/ARK/

- (•) Yes

- ( ) No

31. Will the proposed solution comply with all Canada Life **security standards**? *

Enterprise security standards can be reviewed at https://769372677.sharepoint.com/sites/InformationSecurityRiskAndCompliance/SitePages/Standards-and-Polcies.aspx

- (•) Yes
- ( ) No

32. Will the proposed solution be bound by any **new and/or existing exception(s)**? *

Are there new or existing: data, security, policy, standards, disaster recovery exceptions that will apply to the proposed solution delivery?

- (•) Yes
- ( ) No

33. Please provide more information about any **exception(s) that the proposed solution will be bound by**. *

You answered YES to the question above. Provide a brief summary of why you chose that answer.

Isolated cold standby exception in place for Disaster recovery

34. Will the solution fully comply with all Canada Life **risk control statements**? *

Enterprise risk control statements can be reviewed at https://769372677.sharepoint.com/sites/InformationSecurityRiskAndCompliance/SitePages/Security-Risk-%26-Compliance.aspx

- (•) Yes
- ( ) No

35. Do any of the components within the proposed solution have known Architectural Debt associated with it? *

Canada life has a strong desire to modernize its solutions and to reduce the Architectural Debt that is carries across all its solutions. Current documented Architectural Debt can be found at https://769372677.sharepoint.com/sites/ARK/SitePages/Technology%20Debt.aspx

- ○ Yes
- ◉ No
